

Ice machines are an automatic hazard over a short period of time
"Be caring to your patients, avoid being tagged"

PURESTREAM WATER

Servicing Ice machines, dishwashers,
Refrigerators, Steamers and all Kitchen equipment

Ice machine service overview.

Ice machines require quarterly preventative maintenance. The build up of lime & germs form in just a short period of time.

Service includes: Filter changes, descaling of pipes and reservoirs, air filter and condenser cleaned, drain unclogging and full sanitization of the interior and exterior.

We remove all water stains, to get your ice machine looking new.

Parts are required to be taken apart in order to get a proper interior cleaning.

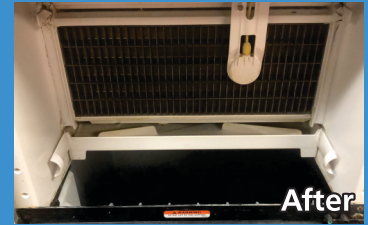

Coil cleaning is essential to the longevity of an ice machine

Get rid of the mold and lime

Get rid of the legionellae

Dishwasher machine service overview.

Dishwashers overtime will build up a lot of dirt and germs, which require attention.

Service includes: All interior parts removed and sanitized, descaling, drain cleaning, interior and exterior sanitization.

Parts removed: Jets, curtains, dirt pans, drain sifter.

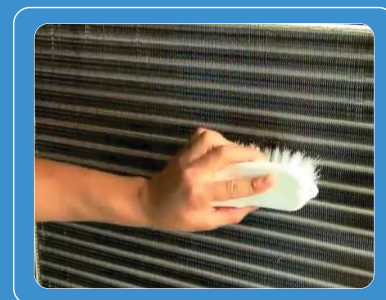

Water cooler service overview.

We provide high grade water filtration systems that will keep your staff and guests hydrated with crystal clean, hot and cold water. No more reordering, storing or remounting (have you ever seen how those jugs spill when they are mounted onto the cooler).

For a low monthly cost we provide full service of your water cooler needs, from installation to filter changes and machine descaling and sanitization.

Food Steamer service overview.

Full sanitization of interior and exterior, especially the bottom of the steamer. Pans and tray holders removed and sanitized.

Gaskets checked and replaced as needed.

Refrigeration service overview.

Coil and condenser cleaning is essential to the refrigeration system. Over a short period of time dust will block the airflow.

Gaskets checked and replace as needed.
